About this document

Typically embedding your Voki Scene into a web page is a simple matter of copy paste. Copy your Voki embed code from your Voki "Publish" area, and paste it into the html document which is your web page.

But some popular platforms or programs may require an extra step or two - and the procedure may not be obvious.

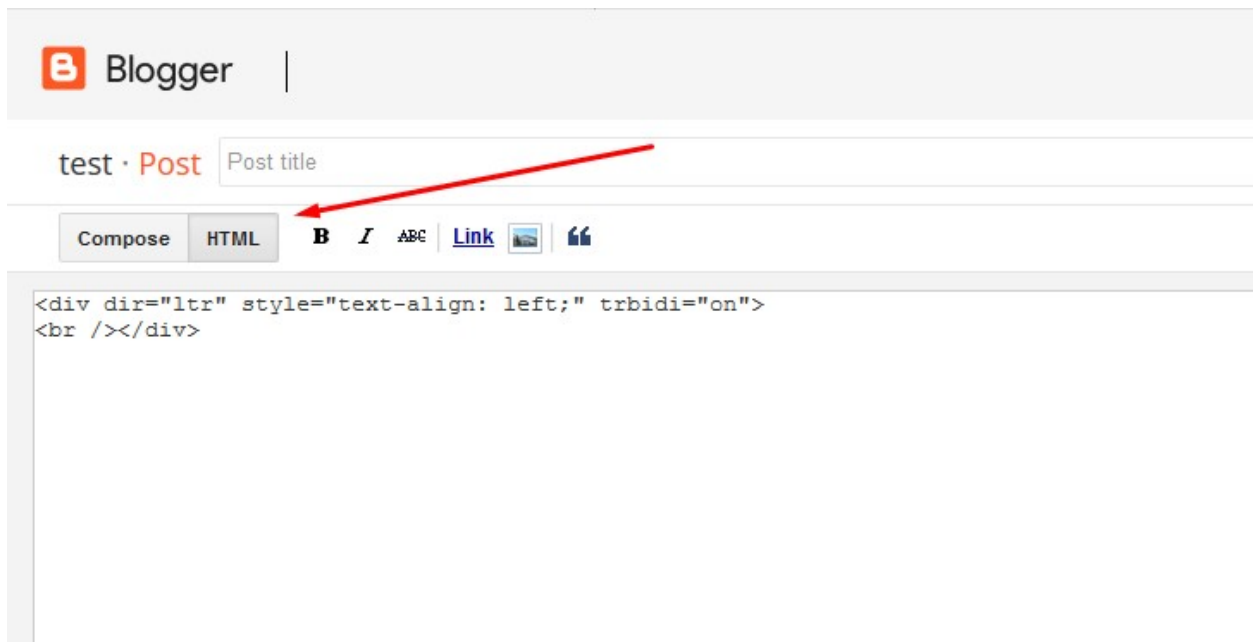

Please bear in mind that programs are frequently updated, and the instructions you see here will also need to be updated from time to time. Though we make every effort to do so, if you see outdated instructions - please let us know.

If the tool/program that you are using is not on this list and you believe it should be - please let us know.

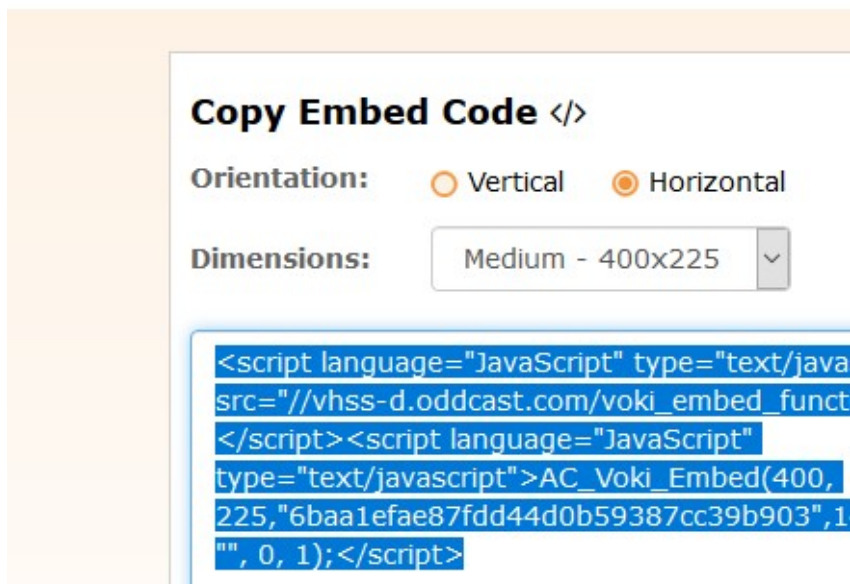

Question or comments? email us at: support@voki.com

A - Blogger

Step 1: Select HTML button from the Editor

Step 2: Goto Voki Account and copy the Embed Code:

Step 3: Paste the Embed code into the HTML Editor within <BODY> Tags -

B Blogger |

test · Post

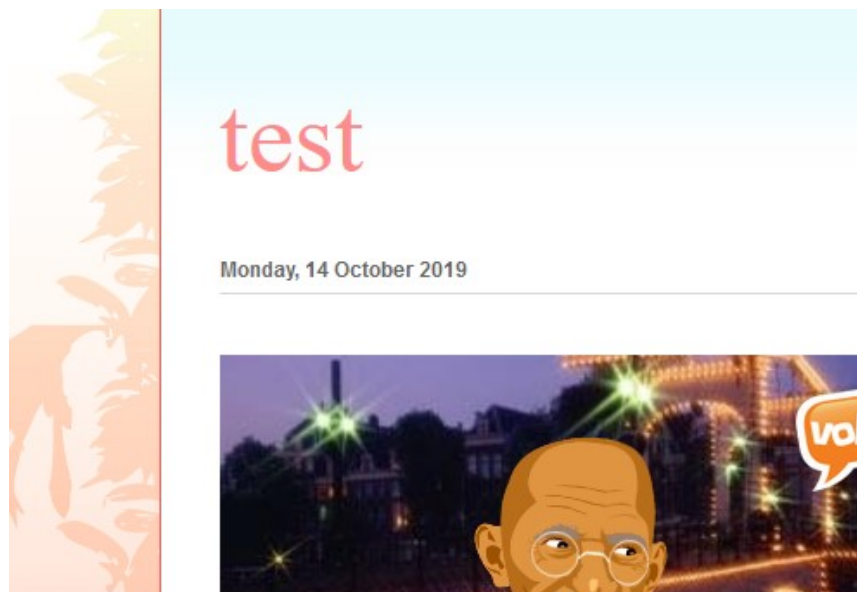

Compose HTML **B** *I* ABC [Link](#)  

```

<html>
<body>
<script language="JavaScript" type="text/javascript" src="//vhss-d.oddcast.com/voki_embed.js"
language="JavaScript" type="text/javascript">AC_Voki_Embed(400, 225,"6baa1efae87fdd44d0b5931");</script>
</body>
</html>

```

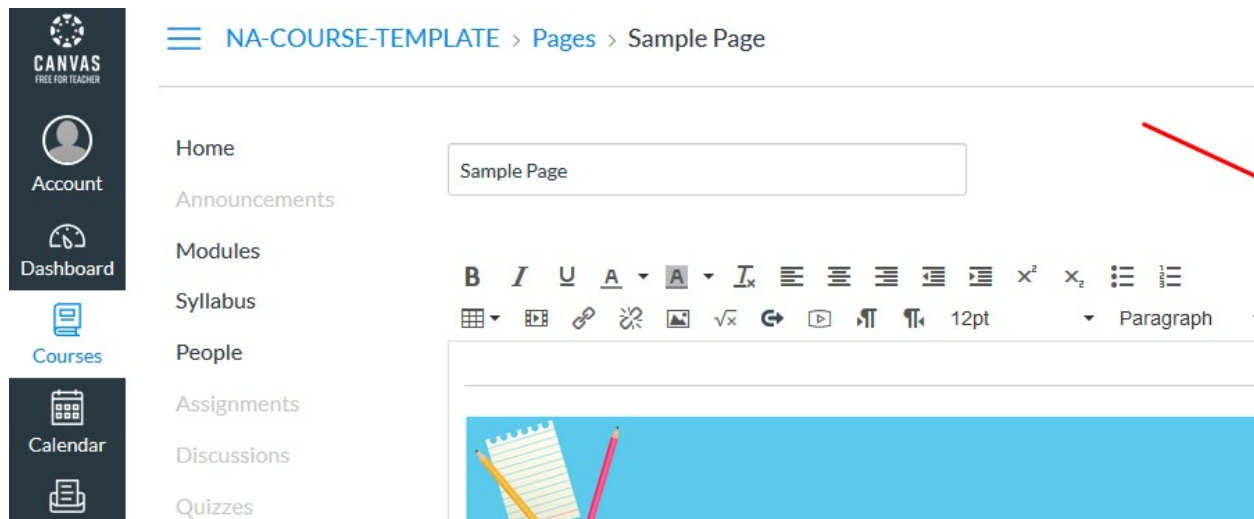

Step 4: Click on Save and Publish-

B - Canvas LMS

Step 1: Click on HTML Editor:

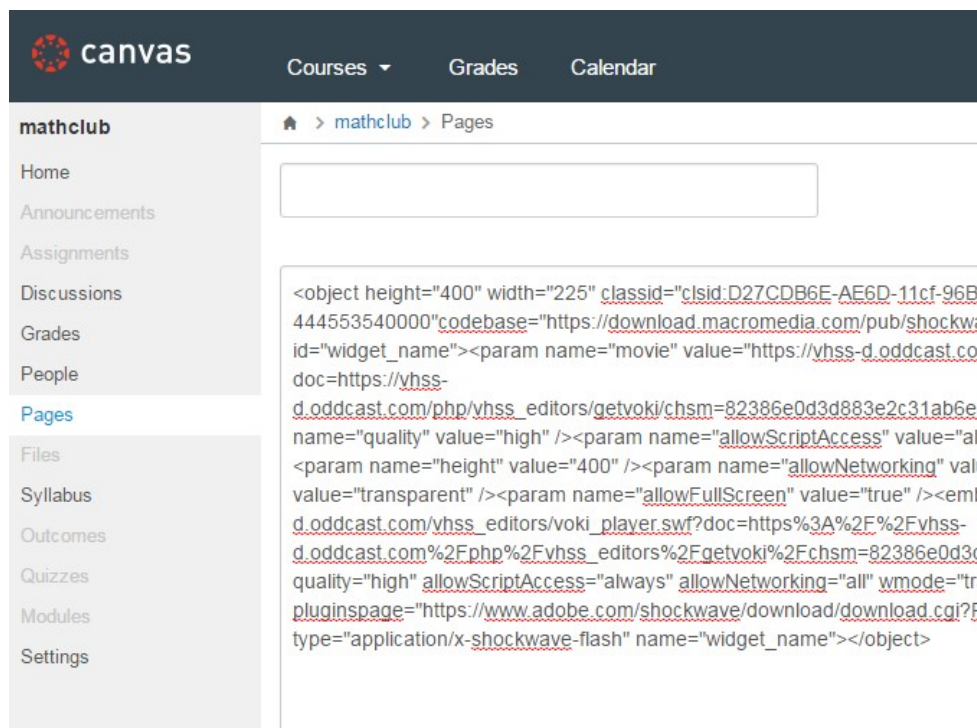

The screenshot shows the Canvas LMS interface. On the left is a dark sidebar with icons for Account, Dashboard, Courses, Calendar, and a document icon. The main content area has a breadcrumb trail: "NA-COURSE-TEMPLATE > Pages > Sample Page". Below this is a list of navigation links: Home, Announcements, Modules, Syllabus, People, Assignments, Discussions, and Quizzes. A search bar labeled "Sample Page" is positioned above a rich text editor. The editor's toolbar includes options for bold, italic, underline, text color, background color, bulleted list, numbered list, link, unlink, image, video, and font size (set to 12pt). The editor area itself contains a blue header with a notepad and pencil icon.

Step 2: Goto Voki Account and Copy Deprecated Embed Code.

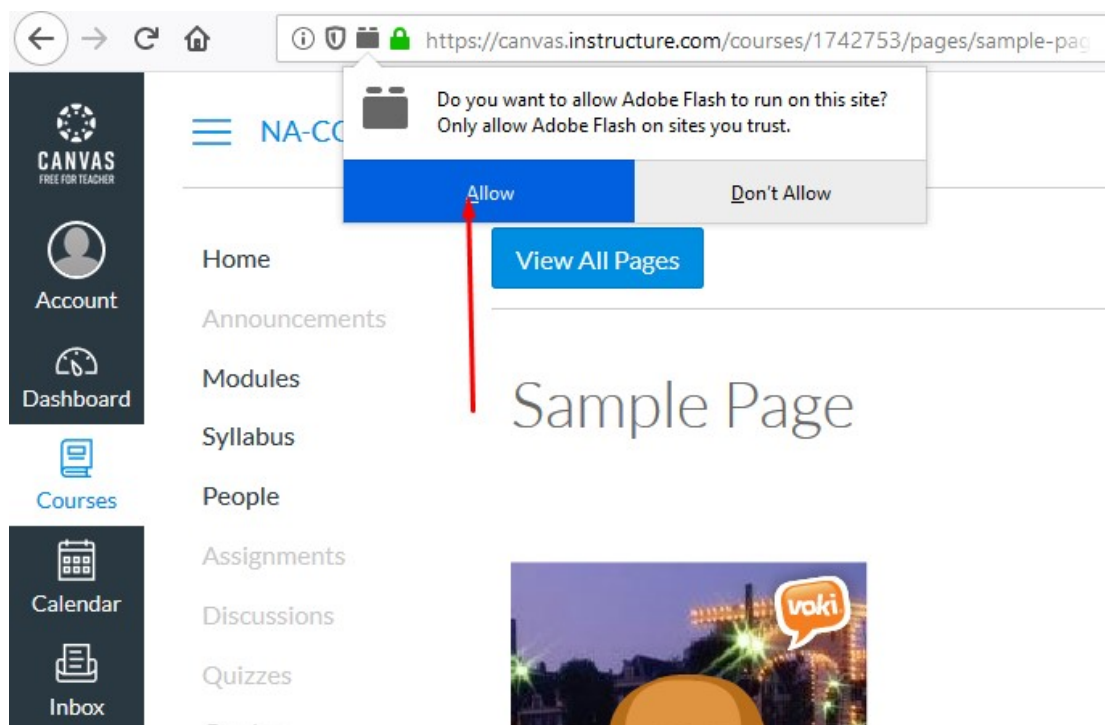

The screenshot shows the Voki "Share Voki Character" page. On the left is a cartoon character of Mahatma Gandhi with a Voki speech bubble. In the center, under the heading "Share Voki Character", are social media sharing icons for Facebook, Twitter, WordPress, and Blogger, along with icons for email, a link, and a code editor. On the right, a "Copy Embed Code" panel is visible, showing the "Orientation" set to "Horizontal" and "Dimensions" set to "Auto". Below these settings, the deprecated embed code is displayed, starting with `<object height="400" classid="clsid:D27C867B-11E1-4049-B053-68247B84499E" src="http://www.voki.com/pub/shockwave/swflash.cab#version=32.0.0.24">`.

Step 3: Paste the Embed Code into the HTML Editor:

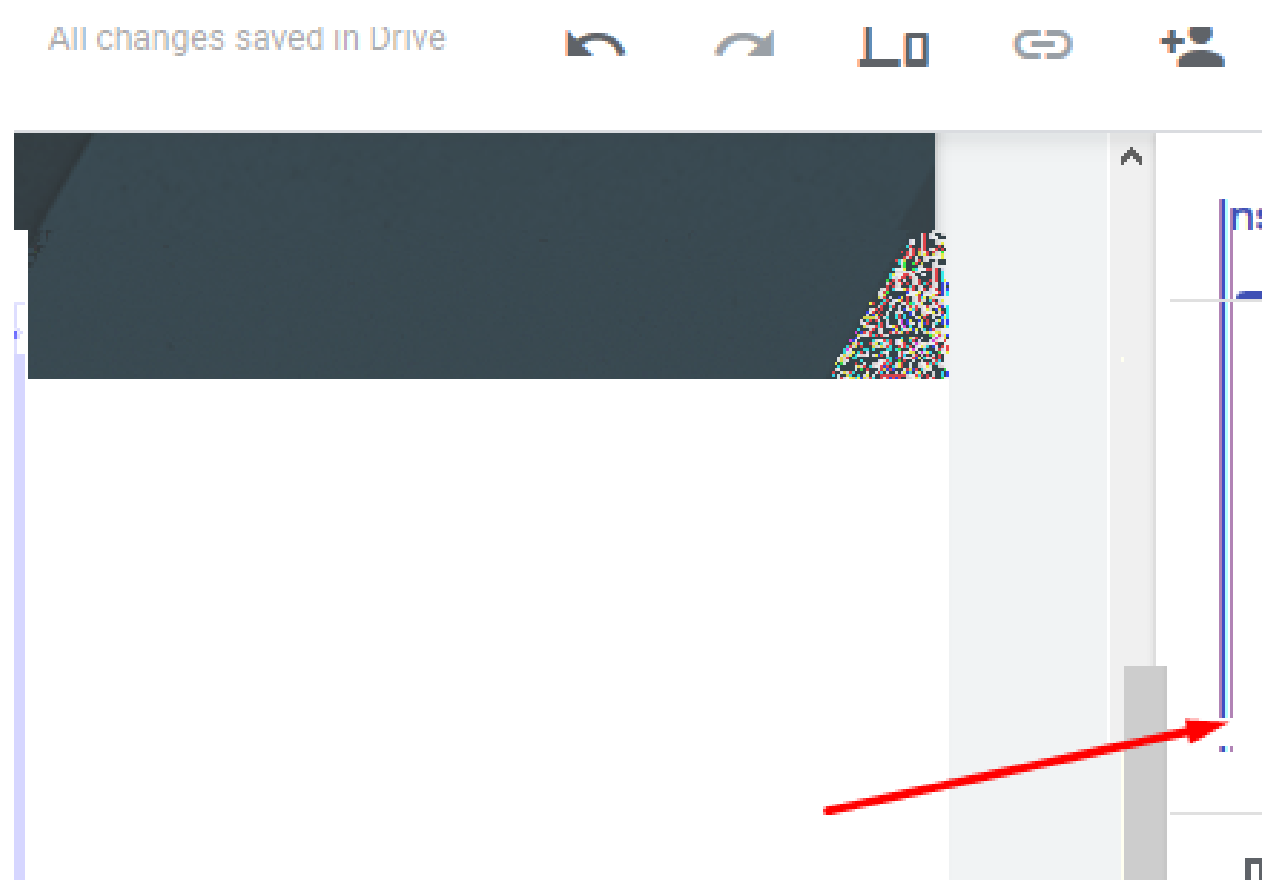

Step 4: Click on Save. Make sure Adobe Flash is allowed for Canvas.

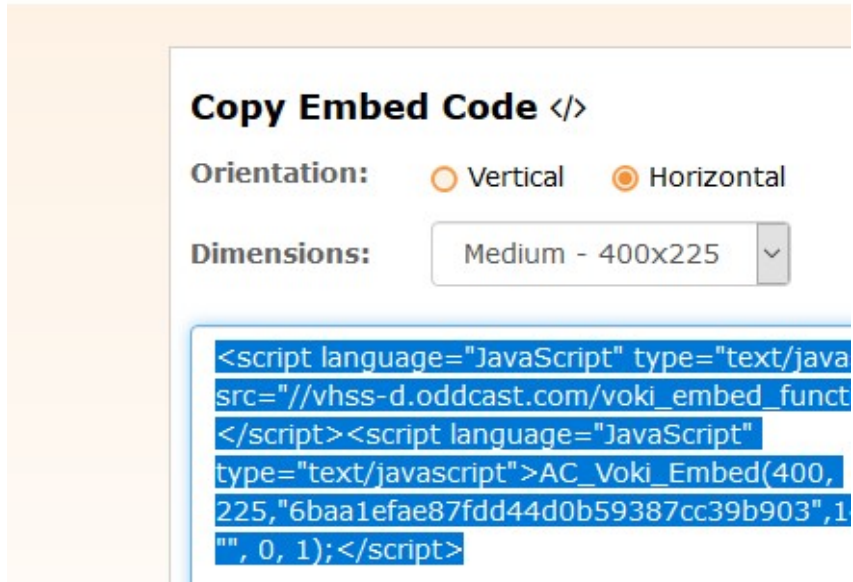

C - Google Site:

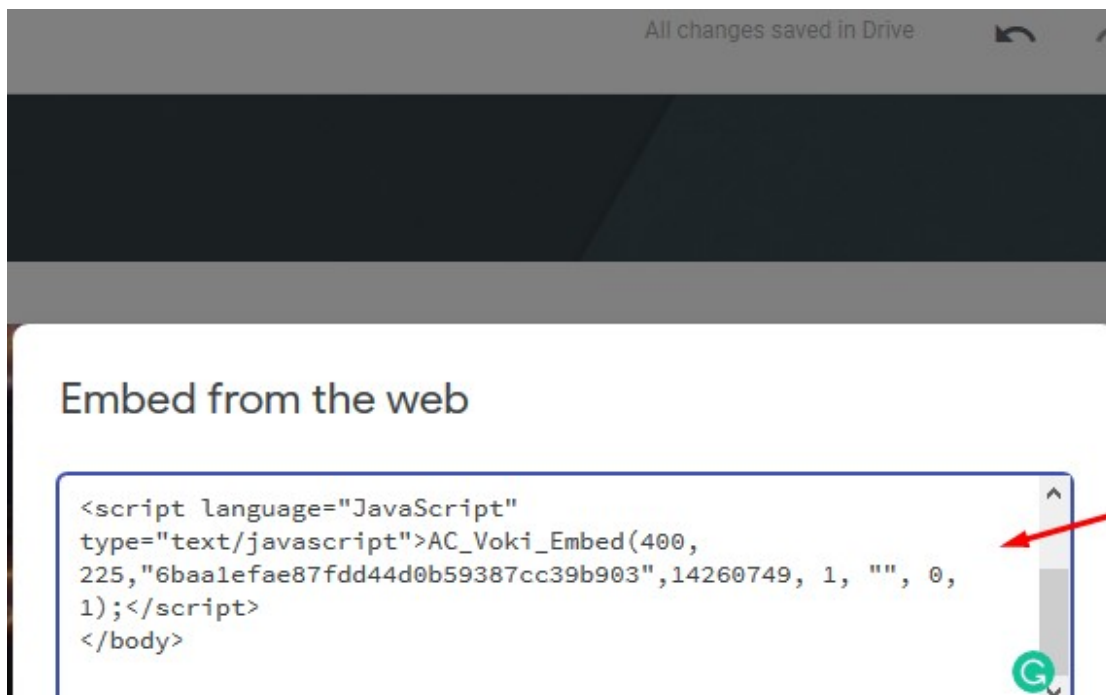

Step 1: Click on Insert >> Embed code

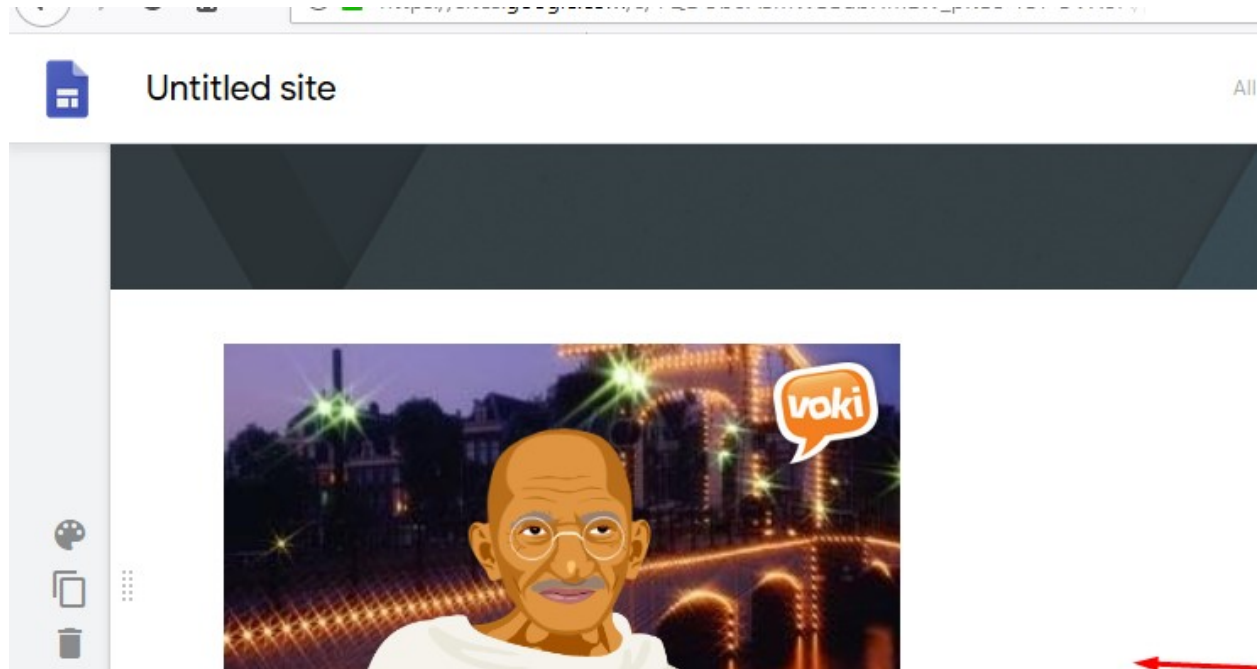

Step 2: Goto Voki Account and copy the Embed Code:

Step 3: Insert the embed code into HTML Editor within <body> tags-

Step 4: Click on Update

D - Smart Notebook

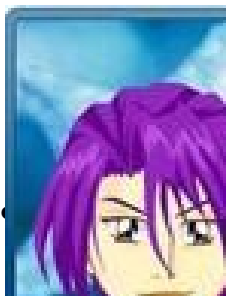

1. Go to SMART

Exchange: <http://exchange.smarttech.com/> and login. If you don't have a login on SMART Exchange, you will need to sign up before you can download lessons, widgets, and more. In the search box, type Voki.

2. Download the voki widget. It will be put into the Gallery in "My Content" – Interactive and Multimedia.
3. In Notebook 11, open a new page, drag the Voki Avatar widget onto the page from "My Content" - Interactive and multimedia.
4. Go to <http://www.Voki.com>, login to Voki, and create an avatar.
5. Publish your Voki. Click in the box under Embed code or click on the Copy button. The code is selected and copied.
6. Go back to your Notebook page with the Voki widget. Click in the white box and Paste your Voki code from Voki.com into the box on your Notebook page. *Hint:* Use your keyboard shortcut (CTRL V for Windows users) to get your code copied into the widget vs. onto the screen.
7. Click go. If you are connected to the Internet, the Voki will begin to animate. You can move it around the page. You can also resize it. As you move your mouse, notice the Voki's eyes are following it. Use the play button to start speaking. Have fun!

E - WordPress:

1: Click on WordPress from Share Options:

2: Enter your Domain name or Webpage URL:

A screenshot of a light blue rectangular form. At the top, it says 'Please Enter your Wordpress'. Below this, there is a text input field containing 'http://myvoki.com'. At the bottom of the form, there is a smaller, partially visible text input field containing 'http://myblog.wordpress.com/'.

3: Enter WordPress username and password:

A screenshot of a WordPress login form. It has a light blue background. The first section is labeled 'Username or Email' and has a text input field below it. The second section is labeled 'Password' and has a text input field below it. At the bottom, there is a checkbox that is checked, followed by the text 'Stay signed in'.

4. Click on the image:

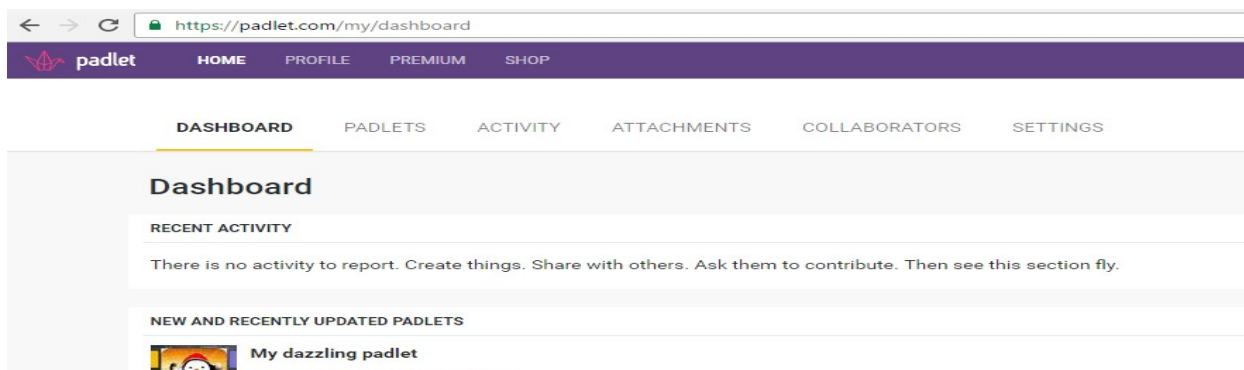

F - Padlets

Copy the Pickup link under embed options (Use Full length URL)

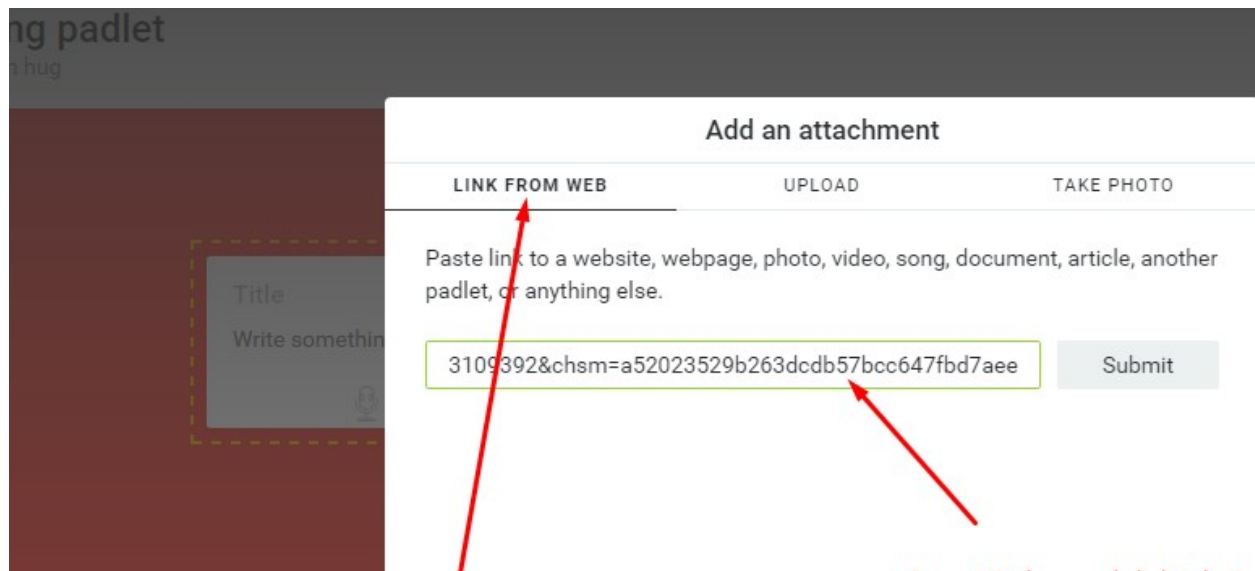

After Logging into Padlet, Click on "New Padlet".

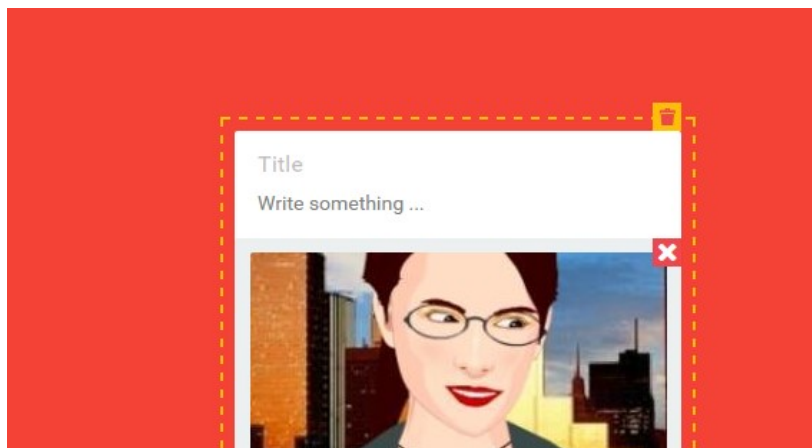

Click on Add Attachment

Select "Link from Web" and paste in your Voki URL:

Click Submit and your Padlet with Voki is ready :

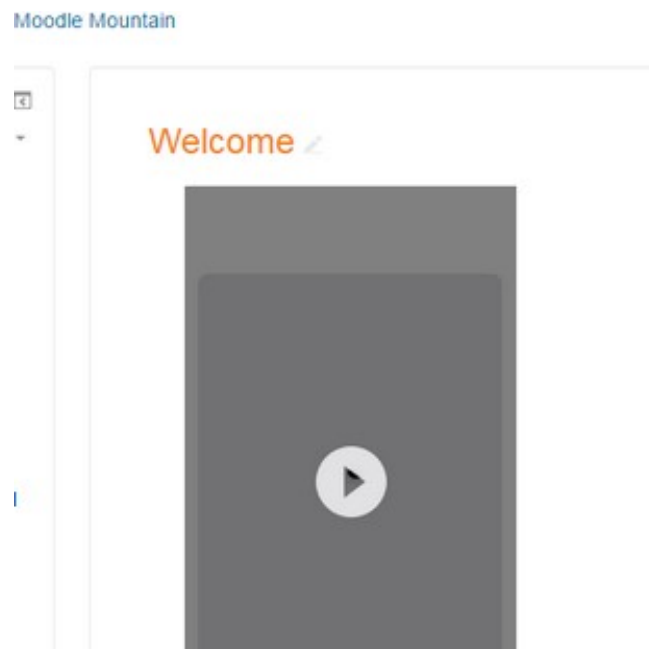

G - Moodle

Step 1: Copy the Deprecated Code from the voki site.

The screenshot shows the Voki website interface. On the left, under the heading "Share Voki Character", there are two rows of orange square icons: the first row contains Facebook, Twitter, Google+, WordPress, and Blogger; the second row contains Email, Link, and Code. On the right, the "Copy Embed Code" section is visible. It includes a "Orientation:" dropdown set to "Vertical" and a "Dimensions:" dropdown set to "Medium". Below these, a text area contains a deprecated embed code snippet. At the bottom right, there are two radio buttons: "New" (unselected) and "Deprecated (u)" (selected).

Step 2: Go to Moodle, Select the Course and click on Edit Section

Step 3: Select the HTML option, Paste the Deprecated Code
